

NUTRITIONAL NON-CULTURED BEVERAGE COMPOSITION

ABSTRACT

The present invention provides a high quality, ready-to-drink, non-cultured nutritional beverage comprising (1) a protein component, (2) an
5 emulsified fat component, (3) a fortification component, and (4) an optional sweetener component. Preferably the protein component comprises minimally processed milk; the emulsified fat component comprises dairy fat; the beverage contains about 1.5 to 10 percent total protein and about 0.15 to about 5 percent total fat; the beverage has a first ratio of the minimally
10 processed milk protein divided by the total protein which is greater than or equal to about 0.45; the beverage has a second ratio of the dairy fat divided by the total fat which is greater than or equal to about 0.33; and the fortification component provides at least 10 percent of the daily value per single beverage serving of at least 6 vitamins and minerals.
